

Required Summer Work for AP Calculus 2022-2023

Seffner Christian Academy

To enable us to get a good start in August for AP Calculus AB, I would like each student to pick up a test preparation workbook at school. They are currently available in the front office.

- Read Chapter 5 on pages 45-83 in test prep book.
- Do Practice Problems in Section 5.6 and Cumulative Review Problems in Section 5.7 on pages 79-80. Show all work on paper and box your answers. Use graph paper if needed. You may check your answers with the solutions and make corrections if needed.

Work is due when you come to class on the first day of school. I am hoping this will enable us to have more time to review for the AP test. Have a great summer in spite of the work. I am excited to start a new Calculus class.
