

# SCA S.T.E.M. Club

Open to anyone with an interest in Science, Tech, Engineering, and Math!

## Details:

This flyer is strictly to gauge the amount of people that are interested in joining. If created, our club would begin by focusing on the construction and flying of model rockets as well as the applications of 3-D design and printing to the field. If we have enough members by that point, then we could possibly move in to other areas of S.T.E.M. such as coding and robotics.

If you would possibly be interested in a club such as the one described, please contact me at:

[tyler.grimsich@scastudents.com](mailto:tyler.grimsich@scastudents.com)

Also, check out the website of the rocket launch site we would use:

<http://www.tripoli-tampa.com>
